

# WERSI Organ

## CONCERTO

### ***Advanced electronics in a masterpiece of cabinetmaking***

*Some people buy performance — some people buy a piece of furniture.  
If your taste leans towards the traditional styling but the musician in you wants the  
ultimate in modern organ features, the CONCERTO W 3 A is your instrument.*

The CONCERTO W 3 A is based on the best-seller Zenith W 3 S. In fact, the features of the CONCERTO W 3 A are also found in the Saturn W 3 T. The entire W 3 family offers such a rich array of features that almost any kind of music can be performed on either model.

It is this modular concept of WERSI's organs which

allows us to satisfy the multitude of the musicians' needs without the expense of complete re-designs. And the resulting savings are passed on to you. Remember, the CONCERTO W 3 A, too, can be "slanted" towards your personal musical inclinations through WERSI's exclusive Sound Computer.

# The WERSI Organ

## CONCERTO W3A offers:
