WERSI LOUVRE GS 1000

THE TOP MODEL OF THE OAS SERIES – LOUVRE GS1000

WERSI is known to perform quantum leaps in technology and instrument manufacturing. In 1976 the Galaxis was developed, in 189 Atlantis SN3 entered the scene and today it is the LOUVRE GS1000. This instrument boasts everything OAS has to offer. You can now invite the world's best musicians into your home!

CLASSIC PEARL WHITE CASE

Your first look at the LOUVRE will enchant you. The classic design and the perfect craftsmanship turn the LOUVRE into an eye-catcher. Take a seat and get comfortable! The seat can be electronically adjusted. More Special Edition finishes available.

EVERY DAY IS A FESTIVE DAY

Dimm the lights of the console and footwell to make the atmosphere more festive. Whether you want to be with Franz Lambert at the Sports Gala, at the president's summer festival or your next pool party - the festive setting is set. The One Touch Control System will show you how to control all of this. It is much easier with 3 manuals instead of just one.

PERFECT SOUND AND ACCOMPANIMENT

The versatile sound collection of the LOUVRE will excite you. And if that's not enough you can access the AKAI-compatible sound library. LOUVRE provides accompaniment styles as well as live recorded rhythms (Real drums) in addition to audio tracks in Wave and MP3 format. Add MIDI files as complete arrangements for particular songs that just need to be finished with melody and vocals.

OAS GOES OAX – THE NEW UPGRADE!

Turn your OAS organ into an instrument of the new OAX (OpenART-Xtended) generation.

Upgrade Verona to SONIC OAX500	€ 7.990,-
Upgrade Scala to SONIC OAX700	€ 8.590,-
Upgrade Louvre to SONIC OAX1000	€ 9.990,-

Important notes regarding the upgrade:

- The advertised price includes the conversion costs. Potential traveling and transport cost are not included. Please contact your WERSI dealer.
- For technical capabilities of the upgrades, please refer to the new corresponding OAX instruments.
- The complete conversion can only be done by trained WERSI dealers. The removed components of the OAS instruments will be sent back to WERSI after the conversion.

WERSI OAS-INSTRUMENTE NOW DRASTICALLY REDUCED

The OAS series will be discontinued and replaced by the technically advanced OAX Sonic organ.

WERSI VERONA GS 500 „PLATINUM“

Classy Design

The VERONA is equipped with 2 x 5-octave, weighted and velocity-sensitive manuals, a built-in speaker system (audio surround), a CD/DVD burner, a USB front panel, Advanced Sound System and One Touch Control. VERONA merges classy design for any ambience and small dimensions, not requiring much room but guaranteed to delight the listener & observer.

Intuitive Operation

VERONA's operation is very intuitive. Music and fun have priority. Get excited about great sounds and rhythms. Simply turn it on and play - no instruction manual required!

The Legendary WERSI Drawbar Sound

By just looking at it you know what it sounds like! 9 drawbars for the upper manual and 7 drawbars for the lower manual generate a rich organ sound. The VST plug-in „B4“ is optionally available. WERSI stars like Franz Lambert or Claudia Hirschfeld have mesmerized their audience with the VERONA. The entire world of music is inside this organ - pop, classical music, big band or rock'n'roll - a breeze with the Real Drum accompaniment!
