PLUS: OAS TO OAX UPGRADES / OAS 7 SOFTWARE / CD's & MORE!

W elcome to the new Christmas Edition of our WERSI News magazine.

We can't believe it's nearly that time of year again! Things are certainly moving at a pace in the WERSI world and we're excited to tell you about things that are coming up throughout this news magazine. This includes an exciting OAX organ tour with Brett Wales, the new OAX upgrade program for OAS owners and also news about the latest software developments from WERSI for both OAS and OAX.

February will see WERSI Direct take to the road for a product demo and informal concert tour. We are keen to show as many people as possible the new WERSI Sonic range.

A new OAX software release is now available for Sonic customers: V1.10. It includes a new 'sheet music' on display function, new styles, new sounds, more functions and a whole lot more. Also, from now onwards, customers can perform the software upgrade themselves with the new auto-update function.

Other exciting news confirmed two weeks ago is that WERSI have nearly finished building the entire WERSI Direct sound library into the Sonic software. Yes, that's right... more than 190 WDL sounds as standard for all Sonic customers from Chris Powell sounds, Blackpool Tower sounds through to Orchestral Colours, Klaus Wunderlich, Helios sounds and more! This is our gift to all UK customers who are buying the new Sonic, and also a promise to all customers who have upgraded to OAX Sonic's who wanted to retain these sounds from their old OAS organs.

Best wishes,

Robert New & Ben Scott Hyde

OKTOBERFEST 2015 DVD

We're hard at work editing the huge amount of video footage from the concerts at Oktoberfest. The DVD release date will be announced shortly. All pre-orders from the Oktoberfest will be sent their copy as soon as the production is complete! It looks great and sounds even better!

MORE SOUNDS COMING FOR THE SONIC!

We can confirm that more than 200 new sounds will be available in the next software release of the new SONIC OAX instruments. The entire WERSI Direct sound library will be included as standard in all SONIC instruments for all customers. This means that customers upgrading from an OAS instrument will retain the sounds that they enjoy from OAS.

LATEST NEWS

Well it's a very busy time at WERSI as we mentioned in our editorial column on Page 2. Not only do we have our fabulous new OAX instruments going from strength to strength, but we also have a new Speaker range to tell you about.

First up is the new OAX software, which is detailed to the right of this column. New functions, new music making power and more.

The OAS to OAX upgrade program is now underway and the first batch of instruments to go to the WERSI factory to be transformed into sparkling new OAX instruments is booked in for January. The popularity of this program means that trips for the rest of the year are now being planned. Please do book your upgrade as early as possible to avoid disappointment in terms of waiting times. It's a door to door service and takes only one week.

New VOCALIS 120 speakers have arrived. We're pleased that WERSI now offer the Vocalis 120 speakers in the following format:

Vocalis 120: White / Black: £999-
Vocalis 120: Black £999-

Vocalis 120: Pearl White: £1,400-
Vocalis 120: Polish Black: £1,400-

Additionally, we also now offer as a recommended speaker system, the new WERSI TS9000 tower speakers.

TS9000 : Pearl White £2,499-
TS9000: Polish Black £2,499-

More details on these new speakers are detailed later in this magazine. They are a great way to give your music making and added spread of sound for a luxurious sound experience.

LOUVRE GS1000 PRICE DROP

The WERSI Louvre GS1000 is now available for a limited time while stocks last at a reduced price of £28,000. This is a £12,000 saving. Finished in Pearl White only and featuring two TS9000 Speakers in matching finish. Complete with a three year warranty. Contact WERSI Direct for more info.

NEW SONIC SOFTWARE UPDATE

Naturally, the Operating System now known as OAX is continually being developed. A new software update for SONIC owners will be available from the first week of December 2015. It will include a host of brand new features. See the next page for a look at the new functions.

ORDER THE OKTOBERFEST 2015 DVD

The Oktoberfest 2015 DVD will be released in February 2016. The new DVD features artists from the 2015 festival and features WERSI artists at the WERSI Verona GS500, Scala GS700, Louvre GS1000 and Sonic OAX700 as well as the famous WERSI Atlantis SN3.

If you'd like to order a copy, you can do so by visiting www.wersidirect.com
Price: £15 + £2 p&p.

NEW SONIC SOFTWARE UPDATE : V1.10

Wersi development of the new OAX software is moving at a fast pace. We can confirm that last month the software OAX V1.05 was released and available to customers that contained many new functions, sounds and styles (covered on this page in our Autumn News Magazine).

This month, WERSI unveil the new V1.10 software. The highlights are the new Music on display function. This means that you can read your sheet music direct on the touch display of the Sonic.

A new Audio Recorder is now available to record and save your music performances. You can also use the new audio record-

as an 'easy' to use 'overdub' recorder too.

There is a new CD player that plays audio CD's too... perfect for learning new music or playing your favourite music CDs.

Finally, the new Input and Output mixers will give you more control and power than ever before. Graphic EQ is available for every part of the instrument, inputs and outputs as well as the ability to save Mixer Presets to store your optimal mixer settings.

The software is available now from WERSI Direct Ltd.

NEW SHEET MUSIC ON DISPLAY

For the first time on a WERSI instrument you can have sheet music on your display. There are 50 music titles included with the new software V1.10 and you can add your own music too as JPG files.

Using the new Multi Gesture technology of the touch screen, you simply swipe your finger to turn the page. It's fast, easy to use and very practical. Music rests will become a things of the past!

New CD Player / Audio Player

The new OAX software features a new CD-Player. Play your favourite CDs. Naturally, all standard controls such as play / stop / forward / backwards / pause and eject are all included, as well as a time counter.

New Audio Recorder

Recording audio is a much desired feature of most new arranger keyboards. WERSI has provided a digital audio recorder that allows you to make perfect digital audio recordings on your Sonic. The audio recorder features an audio meter and timer as well as standard save functions and play / stop / pause / backwards functions etc.

New Input Mixer / Preset Function / Graphic EQ

The new input mixer allows you to control the volumes and EQ of the keyboard manuals, Accompaniments, VST inputs, Audio and Mic inputs perfectly. Each with graphic multi band EQ and the ability to save your own user presets for instant recall. Naturally the mixer also features other professional features such as Solo and Mute functions too.

New Output Mixer / Preset Function / Graphic EQ

The new sound output mixer is equally as comprehensive as the output mixer. Featuring controls for the Main Organ output (output 1), Audio output 2 and Headphones. Each output has independent controls for the left and right channels and can be linked too. There is EQ available for all channels as well as the ability to make total presets and make mixer presets as global / standard settings for the whole instrument.

LATEST NEWS CONTINUED

SONIC OAX500 / OAX600 / OAX700 DVD

WERSI DIRECT have exclusively produced a tutorial DVD for all SONIC customers. The benefit of the tutorial DVD is that it follows an 'easy to understand' introduction to the OAX500, 600 and 700 organs. Naturally, the DVD looks at the entire instrument and gives you an overview of the latest features introduction with software 1.10-01.

SONIC OAX1000 TUTORIAL DVD

Because of the additional manual, bigger cabinet and changes to some of the layout of functions on the OAX1000, naturally we created an exclusive DVD for our OAX1000 customers. Sit back and receive an overview of your WERSI SONIC OAX1000 - the most impressive and luxurious flagship to come from WERSI.

NEW ENGLISH USER MANUAL AVAILABLE

SONIC customers now have a new User Manual available for them. They can download the user manual from our support website:

www.wersi-support.com

The latest manual explains the latest functions and features of the Sonic.

OAS to OAX ENGLISH BROCHURE AVAILABLE NOW!

If you haven't already downloaded our new English brochure for the OAS to OAX upgrade, you can do so on our support website:

www.wersi-support.com

FRANZ LAMBERT RETURNS TO HEADLINE 2016

Organ superstar Franz Lambert returns exclusively to the WERSI Oktoberfest 2016. Franz has been voted the most popular organ artist by Oktoberfest goers and we are excited to confirm that along with Robert Wolfe, Franz will headline the 2016 music festival in Huntingdon. WERSI CEO Robert New said, "We're extremely proud that Franz Lambert will headline the Oktoberfest 2016 for WERSI Direct again. He is overwhelmingly popular and there's nothing like seeing Franz play live."

ROBERT WOLFE DEBUT TO HEADLINE 2016 OKTOBERFEST

International artist Robert Wolfe will join the WERSI ranks next year for a special exclusive concert at the WERSI Oktoberfest. Robert, who will become familiar with the fantastic WERSI organ range over the next 12 months is thrilled to headline the festival. WERSI Direct CEO Ben Scott-Hyde said, "I'm really pleased that Robert has agreed to bring his special style of playing and artistry to the 2016 festival."

A LOOK AT THE SONIC OAX1000

Whether you're someone who admires beautiful instruments or someone who is devoted to making great music fast, or even someone who just wants to explore the wonderful world of WERSI organs, the Sonic OAX1000 is for you.

When the OAX1000 was announced in the Autumn of 2015, it came as a pleasant surprise. We were not expecting the WERSI development department to bring out a new flagship for some time.

We (at WERSI Direct) were also a little bit in awe of the various possibilities that three manuals could provide players with. On the Sonic OAX500-600-700 and 800 models, that have two keyboard manuals, we'd already seen the wonderful ability to be able to split and overlap sounds on all manuals and pedals. You could create illusion of playing 4 or 5 manuals. With the Sonic OAX1000, you could greatly increase this. It's just mind blowing. No WERSI organ before has ever provided such SONIC sound brilliance.

Add to the wonderful sound possibilities the exciting new SONIC sound library, which is about to be greatly expanded, the new SONIC is just wonderful. The SONIC OAX1000 features more than 1000 sounds. The Grand Piano sounds are nearly 1 GB in size alone! The Theatre Organs are fantastic and have been improved and worked on since their first appearance in the WERSI OAS range more than ten years ago. The WERSI sound designers have worked hard to create an organ that is user friendly and outstanding for all musical genres.

The new SONIC range has a massively improved orchestral sound section. There are new large String sections, lush string ensembles, beautiful new flutes, saxophones, clarinets and more. Then when we throw in the new brass, brass stacks, ensembles, horns, orchestral movie type sounds, it's the ultimate dream organ. A lot of what was formerly 'exclusive to WERSI developers and star artists' is now standard and accessible for all customers, which is a huge plus. The new Sonic operating system software V1.10-01 has opened the instrument up further.

The new accompaniments for the WERSI Sonic are phenomenal. 150 Audio Styles compliment the additional WERSI Styles that have been developed for the Sonic from scratch. Start artist Robert Bartha opened up his recording studio and production facility to create the new styles for WERSI.

All styles and Realdrums (a style with a real audio drum track) have four variations, three intro and endings, 4 fill ins and 2 drum breaks. On the new Sonic we have a new Auto-Accompaniment system that is out of this world. For the first time on a WERSI organ (we keep saying this, but it's true!) we have 8 track auto accompaniment that also corresponds to complex MIDI commands, which for those who that may sound like technical jargon, it means that the accompaniment sounds can be programmed to act just like real instruments. Real pitch bends, slides, velocity changes as well as filter, attack, release and sustain settings... and many, many more! It's very cool.

You can view sheet music on the TFT Touch Display as well as lyrics and more. It's fantastic. It really is. Also, you can add your own sheet music. This is great. More and more online sheet music retailers are providing sheet music as digital downloads. WERSI Direct will be offering a sheet music service in 2016. This will mean that you can send a request for sheet music files, we will source them for you and you just pay for the files and load them in. Of course if you're technically minded, you can do this yourself direct without our assistance.

The new Sonic OAX1000 like it's little brothers can be upgraded by software. You simply pop in a USB stick and press the 'software update' button. The on-screen instructions take you through. It's so simple.

What does the future hold for anyone considering buying a new SONIC OAX1000? Well first of, it means that you look forward to a lot of exciting innovations be added to your instrument. It also means that you'll look forward to a mixture of free sounds, free styles etc as well as new expansions that will be chargeable like on the OpenArt-System that preceded the new SONIC.

Already, WERSI have integrated the new Hauptwerk Silberman virtual organ into the Sonic. The Sonic is the first and only instrument that is powerful enough to run the Hauptwerk system. There are literally hundreds of classical organs that can be loaded into the Sonic OAX1000 Hauptwerk system. There is also a good number of excellent Theatre Organs too. Never before has such possibilities existed in one instrument. This is great news for people who do not want to have lots of

separate modules, computers connected with old MIDI cables etc. More and more we see that customers want an 'all in one' solution. The WERSI Sonic is exactly that.

The three manuals of the OAX1000 means that you can really play a classical / church / theatre organ. The powerful internal speakers obviously complement the power needed for making this type of music.

However, the Sonic OAX1000 is much, much more than a classical organ or a theatre organ. As already mentioned, it can be whatever you want it to be. For example, it could be the ultimate synth and pop organ. With more than 300 synth sounds, a real synthesiser at the heart of the organ with filters, oscillators and more, you can create revolutionary modern sounds for our world productions. Marry the sounds with the new Realdrums and you have something really very special. You can use the six SFX buttons as 'Drum / FX / Phrase trigger pads like a DJ would at a club, or live DJ performance. The new CC control volume drawbar allows you to control effects such as Filters etc and many more functions will be added shortly.

The new digital drum kits are very cool. There is a whole host of new Drum Kits ranging from Ballad type kits to Hip-Hop and Latin Drum Kits. 80's Drum Kits, Dance Drum Kits and Swing, Brush and Jazz drum kits have been newly created for the Sonic. Of course all of the old drum kits from the WERSI OAS range are also present. This means that you take styles from your old organs if you're upgrading to a Sonic, or moving up to a new Sonic. Great stuff.

WERSI have provided a dual Drum and Accompaniment sound engine, which means double the amount of musicality from your Styles!

Making the big sound... With the Sonic OAX1000 you can freely assign up to 16 sounds between the three manuals and the pedal board. The options are unbelievably impressive and you can create a large sound almost straight away. For every sound, you can then adjust

the octave of the sound up or down by one or two octaves, you can tune the sound, you can transpose the sound, you can adjust the amount of two different reverb, chorus and delay effects.

You can also set the values of the additional parameters such as how the swell pedal responds, whether you'd like to make the sound touch sensitive etc.

The Sonic OAX1000 is also 'after touch' responsive on ALL three manuals. This is great news, and means that you can make your playing more expressive than ever before. With aftertouch activated, you can make choirs vibratos increase on the lower manual when pressing a chord harder, or make them sing out of tune! It's a lot of fun, but more importantly, it makes your music making better and more dynamic and realistic. We love this new function and knowing that you can also program what the aftertouch will effect is welcome news.

The Sonic OAX1000 features 5 chrome pistons as well as two programmable foot switches built into the swell pedal. From here you can program a variety of functions from piano sustain, effect (SFX) sounds, start / stop, fill ins, change presets etc.

The Total Preset system of the Sonic OAX1000 is a joy to use. You have access to banks and banks and banks of presets. The WERSI Factory Presets are pretty good too. What's more, for the first time ever every factory style has four registration presets linked to them under the new 'Sound to Style' function. There are literally hundreds and hundreds of factory Total Presets. This covers the traditional WERSI organ sounds such as Franz Lambert and Klaus Wunderlich type sounds through to lush Piano and Orchestra registrations.

Wonderful soloist combination sounds and more are also standard on this instrument and naturally there's a huge user space available for customers who like to make their own total presets. The Total Presets can be named, the banks can be named and you can use your finger to 'swish' through the banks. The Sonic OAX1000 also has total preset buttons between the manuals too for quick access. You'll also find buttons to move up and down through preset banks.

OAS TO OAX UPGRADE

Great news comes in all different forms, but for WERSI OAS owners, this is perhaps the greatest news ever.

The details of the new upgrade is as follows... WERSI OAS Verona and Scala customers will be able to upgrade their instruments to OAX.

WHAT IS INCLUDED IN THE UPGRADE?

The upgrade includes all new metal work, new internal circuit boards, all new PC parts, new operating system and of course OAX. all OAS parts are replaced.

- **All new metal panels to match your instrument.**
- **New circuit boards and brushed silver buttons.**
- **New musical hardware parts.**
- **New PC parts and drives.**
- **New 11.6 inch TFT touch display with 16:9 movie resolution.**
- **New OAX Operating Software.**
- **English Tutorial DVD.**
- **English User Manual.**
- **3 Year Warranty.**

HOW MUCH DOES THE UPGRADE COST?

The upgrade is substantially cheaper than purchasing a new OAX instrument. Please see the pricing on the next page.

CAN THE UPGRADE BE DONE AT MY HOME?

At this time, the upgrade will be carried out at our German factory. If you purchase the upgrade, the pricing includes the WERSI Direct technicians coming to collect your instrument, where it will be driven to the factory in Germany and returned to you shortly after.

Currently, we plan to take 4-5 organs at a time to the factory to be upgraded and will be running a fortnightly program of upgrades.

We must stress that we are anticipating a high demand for the upgrade service and all orders will be on a first come first serve basis, so please do not delay in placing your order for the OAS to OAX upgrade.

WERSI DIRECT MAKE CHRISTMAS IN LONDON

The WERSI DIRECT team held their annual Christmas staff and team party in London in December.

Joined by artists such as Brett Wales and Robert Bartha, the festive cheer and merriment was free flowing.

Director Robert New said; "It's always nice to get everyone together, and to say thank you to our team, including those people who work behind the scenes and don't appear at public events. We had a great time and we'd like to say a big thank you to our hard working and dedicated staff and everyone who contributes towards the success of WERSI across the UK."

You can meet the team and artists at the upcoming Sonic OAX Promotional tour in 2016 as well as at the Oktoberfest 2016.

CHRISTMAS DEALS FOR YOU

OpenArt-Arranger - £499 (RRP £555)

The WERSI OpenArt-Arranger from WERSI for all OAS 7 instruments allows you to have a completely new Arranger Section of your instrument. New styles, new intro and endings as well as the ability to create and edit styles from scratch mean that you'll be making music in no time. It also means that you can add Yamaha Tyros styles too!

CHOIRS OF ANGELS - £140 (RRP £199)

The latest software from WERSI Direct is a collection of choirs and soloists. From Scat Singers to Operatic Vocals, this collection is stunning in its quality and versatile musical applications. Complete with a stunning library of SFX of vocal sounds, it's simply beautiful.

BEST OF CD-LINE DRAWBARS - £49.99 (RRP£69.99)

A large collection of WERSI CD-Line Drawbars. Sampled with WERSI Voice and more. WERSI Spectra CD700 and Atlantis SN3 Drawbars are all covered in this comprehensive collection.

CHRIS POWELL EDITION - £49.99 (RRP£69.99)

Wonderful Theatre Organ sounds from world acclaimed Theatre Organist Chris Powell. Perfected on his WERSI Verona organ, the sounds are a collection of sounds from Chris Powell's own concert program.

BLACKPOOL TOWER SOUNDS - £49.99 (RRP£69.99)

The Blackpool Tower Organ Sounds are truly unique. Taken from the first WERSI Sample recording session of the tower organ, these sounds sat unprocessed for more than ten years. When found in 2014, WERSI Direct worked hard to produce a beautiful sound set of authentic sounds for your WERSI OAS instrument!

WERSI DIRECT ONLINE

WERSI DIRECT WEBSITE

As well as holding all of the information on the current WERSI product range, the latest news and more is always available on the website. Of course you'll also find the online store too, which is easy to use.

www.wersidirect.com

WERSI SUPPORT RESOURCE SITE

We're committed to providing as much resources as possible to allow customers to 'self help' and learn about their instruments at their own pace. You'll find product information as well as historical WERSI product info, support for our customers abroad, user manuals, software downloads and more.

www.wersi-support.com

WERSI DIRECT YOUTUBE CHANNEL

We have a YouTube channel where you can watch product demonstrations, performances, tutorial videos and more.

In 2016, we'll be adding more content, and giving customers the opportunity to send in 'how to' requests so we can create videos directly for you. Visit:

www.youtube.com (search **WERSIDirectLtd**)

WERSI DIRECT MONTHLY PODCAST!

WERSI DIRECT LTD host a monthly radio podcast show. The show highlights WERSI artists, individual WERSI organs and features humour, chat and more from Ben Scott-Hyde and Charlie Weeks-Bell. The Podcast has become a popular fixture of the WERSI Direct empire and fuses music recorded on old and new WERSI organs into a fun show.

Our 'Soundcloud' channel website that hosts our Podcast can be found here:

CLAUDIA HIRSCHFELD: ON THE ROAD WITH CLAUDIA & THE SONIC

Over the past few months, anyone who's a user of Facebook will not of failed to notice that Claudia Hirschfeld has been touring across Europe with the new Sonic OAX1000 and Sonic OAX500 organs. She's been thrilling audiences with her unique style and brilliant concert program on the new organs.

Claudia Hirschfeld took delivery of her WERSI Sonic OAX1000 this Autumn and has quickly produced an impressive program on the new WERSI flagship organ.

The tour of continental Europe started in November and went on until the start of December. The tour saw Claudia perform on both the flagship as well as the new compact home organ 'Sonic OAX500' organ. As well as performing concert pieces, Claudia also demonstrated the instruments abilities, unique and new features and more.

Claudia will be coming to the UK in 2016, naturally performing on the WERSI Sonic range. Be sure to hear her fabulous musical talents and check www.wersidirect.com regularly for dates.

ROBERT BARTHA

International superstar organist Robert Bartha and friend of WERSI Direct has also been on the road with WERSI SONIC OAX1000 too. Criss crossing Europe parallel to Claudia Hirschfeld, the tour de force that is Robert has brought his music to many different venues and stages.
