

Software Update Information

At this point, we would like to thank the OAX customers who are directly working to improve the OAX system through their hints and suggestions.

Software-versie:	2. 90-0 0	Releasedatum:	05. Augustus 2022
-------------------------	------------------	----------------------	--------------------------

Easy Submanual Split

With the new Easy Split for the lower manual, you can keep track of which colors you play in the lower manual on the right. The desired split point can be entered very easily by pressing the desired button on the lower manual.

All STS presets for the factory styles have been expanded with a split in the lower manual. You can easily set whether to play the STS preset with or without sub-manual splitting.

New selection of the variable Drawbars

Due to the expansion of the live organ FARFISA Compact and in preparation for upcoming expansions in the field of live drawbars, the selection of the live organs was rebuilt.

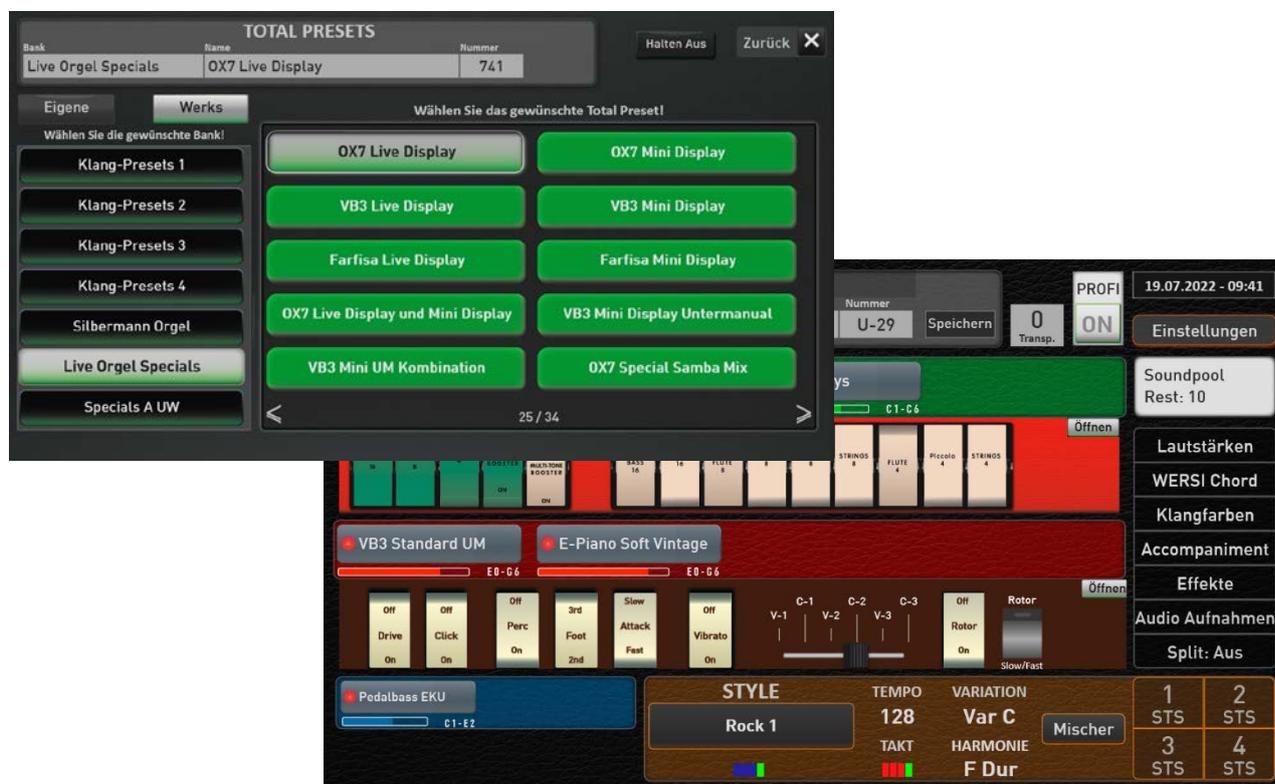

New MINI Displays of the Live Organs in the Main Display

Each Live Organ has its own MINI Display, which you can display in the main display if desired.

A total of ten presets are stored in the factory presets range to give you a quick overview of the possibilities.

741	Orgel Live Specials	OX7 Live-weergave	This Total Preset opens the large display of the OX7.
742	Orgel Live Specials	OX7 Mini-scherm	Preset opens the OX7 mini display.

750	Orgel Live Specials	OX7 Speciale Samba Mix	OX7 Wind Mix met OX7 Mini Display

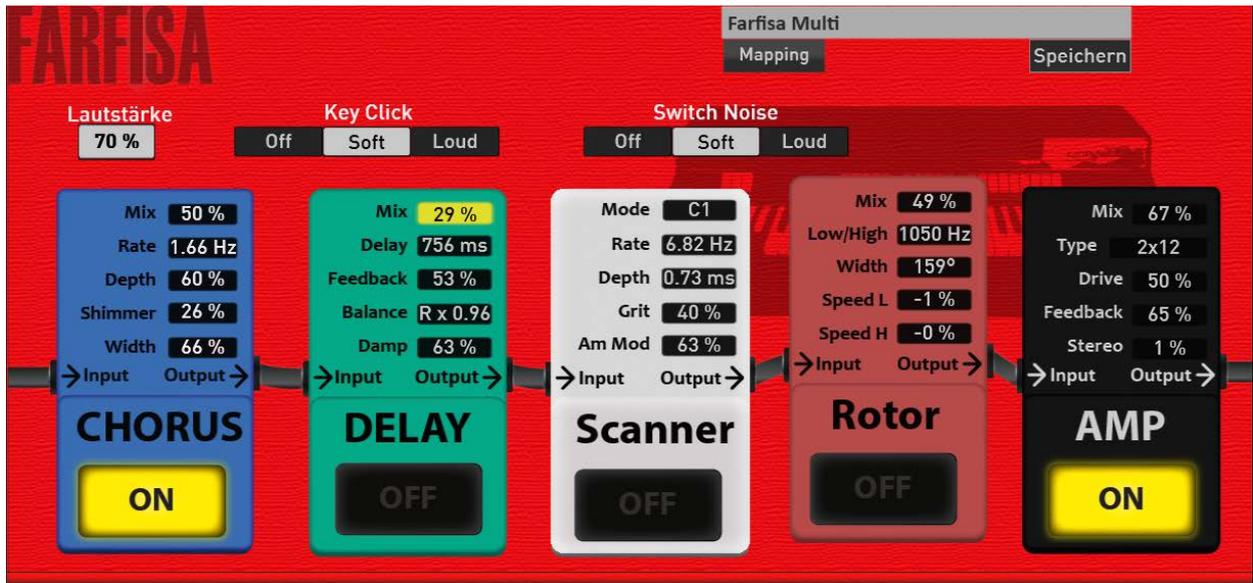

The Legendary FARFISA Compact Organ.

The first portable organ from the Italian manufacturer FARFISA was the Compact series, which was released in 1964.

The red Compact Combo organ was the star of the series and was used in many bands.

The built-in effects give the sound the finishing touch. Chorus, echo, scanner vibrato, rotor and an amplifier effects are available.

Customer requests:

1. At the request of the customer, there are five new sound effects from the aircraft sector. For this purpose, a new effect sound preset F014 "Aircraft" has been created. Airplane piston engine on the ground, 3x past flying effect and once the effect of multiple planes flying by.
2. When playing with the foot pedal, the note played is shown in the display.

Various bug fixes
